PROJECTS

AI-Powered Customer Retention Decision Intelligence Platform (Churn-API)

Developed an advanced end-to-end customer retention intelligence platform using Python, Machine Learning, NLP, and MongoDB. The system performs churn prediction, customer segmentation, churn forecasting, and revenue risk analysis to identify high-risk customers and business impact. Integrated NLP-based customer feedback intelligence to analyze sentiment, complaints, and text-based churn signals. Built an interactive Streamlit dashboard with executive KPIs, decision intelligence summaries, and real-time insights.

Java Library Management System

- Built a full-featured library management application using Java with a user-friendly Terminal based for managing books, members, and transactions.
- Implemented functionalities including book issue/return, fine calculation, search, and inventory management.
- Integrated MySQL database for persistent storage of book records, member details, and borrowing history..

TECHNICAL SKILLS

Languages: Python, C++, C, Java, SQL, NOSQL

Developer Tools: Git, GitHub, MS Excel, Linux, postman, Jupyter NB

Technologies / Frameworks: MySQL, Supabase, SQL server, MongoDB, Machine learning Fundamentals

CERTIFICATIONS & PARTICIPATIONS

- Artificial Intelligence – Infosys SpringBoard
- Intro Of Data Science -- Infosys SpringBoard

LANGUAGES

Hindi: Native

English: Intermediate
